

REFERRAL LETTER

Date: 03/10/2026 (fake)

Re: Patient Alex Synthetic-Lee, DOB 09/09/1988 (fake)

Patient is referred for lumbar spine MRI due to low back pain.

Duration of symptoms is not specified in this letter.

PHYSICIAN EXAM NOTE

Chief complaint: Low back pain, no radiation reported. Symptom duration is documented as 2 weeks, per patient report.

Neurological exam: Full strength (5/5) in both lower extremities, bilaterally symmetric. Sensation is intact to light touch throughout both lower extremities. Deep tendon reflexes are 2+ and symmetric bilaterally. Patient denies bowel or bladder changes. Patient denies fever, unexplained weight loss, trauma, or history of cancer.

TREATMENT NOTE

Patient has not tried any medication for this pain and has not started physical therapy - both are confirmed absent by patient interview today. No prior imaging of the lumbar spine has ever been performed, confirmed by chart review.
