

REFERRAL LETTER

Date: 05/12/2026 (fake)

Re: Patient Robin Synthetic-Park, DOB 03/03/1980 (fake)

Patient referred for lumbar spine MRI due to low back pain radiating to the left leg, ongoing for 9 weeks.

PHYSICIAN EXAM NOTE

Neurological exam: Motor strength is 4/5 in the left lower extremity, a mild but clear weakness in the L5 distribution. Sensation is intact throughout. Deep tendon reflexes are 2+ and symmetric bilaterally. Patient denies bowel or bladder changes. Patient denies fever, unexplained weight loss, trauma, or history of cancer.

TREATMENT AND IMAGING HISTORY

Patient has not tried any medication for this pain.

Physical therapy: 6 sessions completed over 6 weeks, mild improvement noted.

Symptom duration is 9 weeks, per patient report and referral letter.

Lumbar spine X-ray performed on 01/05/2026 showed no acute findings.
